This rare book turns spotlight on world's endangered animals, and captures them in their natural splendour. It gives an in-depth analysis of many threatened species, such as, Polar bear, Black buck, Giant panda, Black rhinoceros, Brazilian tapir, platypus etc, living on this planet.

Packed with information and based on the observation of leading naturalists, the book discusses threadbare these animals habitat, scientific name, family, food and area of location. It enlightens the readers about the preservation of these species and creates awareness about their role for the harmonious sustenance of the mother planet.

Lavishly peppered with illustrations, it will leave you hungry for more.
